

Orthopaedics Residency Program

Original ACGME accreditation date: 07/01/2006

Program Director Name (Year appointed)

Norman B. Chutkan, MD (2016)

ACGME Current Approved Complement

20

Accreditation Status

Continued Accreditation

Length of Training

5 years

Accomplishments

- ▶ Our program has consistently produced high quality, well trained orthopaedic surgeons who continue their education in fellowships and enter very successful practices.
- ▶ Since the first graduate of the program in 2011, there have been a total of 30 graduates, 29 out of 30 (97%) have passed the written exam on the first try, and 16 out of 16 (100%) have passed the oral board exams on the first try, per the American Board of Orthopaedic Surgery.
- ▶ In 2021, our residents scored, as a group, in the 74th percentile of the 238 North American programs participating in the Orthopaedic In-Training Examination (OITE). The year prior they scored in the 88th percentile. This continues to be a notable achievement, and credit is given to the program as a whole and in particular to the residents and faculty.

Strengths

1. Our main goal is to train very knowledgeable and highly skilled orthopaedic surgeons to provide excellent patient care.
2. Program focuses strongly on research, requiring yearly projects which are presented at the Annual Resident Research Symposium.
3. Our faculty come from diverse backgrounds and have a wide variety of research interests and opportunities for resident involvement.
