Clinical Professor, Biomedical Informatics
Researcher, Division of Clinical Data Analytics and Decision Support,
Internal Medicine
Director, Critical Care Selectives
Residency Program Director, Pulmonary Disease and Critical Care
Medicine, Internal Medicine
University of Arizona College of Medicine – Phoenix

Robert A. Raschke, MD, MS, has a master's degree in biostatistics and clinical research design and has been involved in teaching and the practice of Critical Care since the 1980s.

Dr. Raschke is a Clinical Professor of Medicine and Biomedical Informatics at the University of Arizona College of Medicine – Phoenix. He has been a full-time clinician for most his career, and has published impactful research in the areas of standardization of intravenous heparin therapy for venous thromboembolism and development and implementation of an EMR-based clinical decision support system to prevent adverse drug events. Recently, Dr. Raschke published research demonstrating that ACLS simulation can improve patient survival from cardiopulmonary arrest.

Dr. Raschke previously served as the Medical Director of Simulation at Banner University Medical Center – Phoenix, and is currently the Director of the Critical Care Medicine selective for medical students at the University of Arizona College of Medicine – Phoenix.
