

# Volunteers with Post-Concussion Headaches Needed for Research

Mayo Clinic is seeking volunteers who have recently had a concussion and have post-concussion headaches to participate in a research study. The purpose of this study is to find predictors of post-concussion headache persistence and methods to treat post-concussion headache.

You may be eligible to participate if:

- You are between 18 and 70 years old
- You have had a recent concussion and have post-concussion headaches

Over several research visits, we may ask you to complete questionnaires, provide a blood sample, participate in neurophysiologic testing, and have an MRI of your brain. Some individuals will be asked to participate in a clinical trial that tests a treatment for post-concussion headaches.

You will be compensated for your time spent in this study.

For more information, contact a member of the study team at 480-342-3775 or [radam.teri@mayo.edu](mailto:radam.teri@mayo.edu)
